DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Koizumi et al. (US Patent 6,423,263). Koizumi et al. discloses a method of blow molding and heat setting a crystalline resin wherein the dwell temperature is between (the crystallization temperature minus 20)°C and (the crystallization temperature plus 30)°C (column 3, lines 10-15). This is within the range claimed in the instant application. It should be noted that Koizumi et al. does teach that if the dwell temperature is lower than (the crystallization temperature minus 20)°C, the crystallization is insufficient (column 3, lines 15-18 and column 5, lines 32-33).

Allowable Subject Matter

3. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Suguwara et al. (US Patent 6,303,071) and Masumoto et al. (US Patent 4,517,151).
